

## ELISTAIR, WINNER OF FRANCE 2030, ACCELERATES ITS GROWTH

Lyon, October 14, 2024 – [Elistair](#), a global leader in tethered drones for defense and public safety markets, has been selected as a winner of the "Excellence in Robotics and Smart Machines" call for projects under the France 2030 plan.

Launched in July 2023 as part of the France 2030 strategy, this call for projects seeks to drive the development of cutting-edge robotic solutions. Its objective is to promote the rise of new industrial leaders capable of innovating in rapidly expanding sectors and to position France as a key player in the global robotics landscape.

Elistair was selected for its project to advance Khronos, a fully automated tethered drone box. This new version will offer enhanced capabilities, including an increased flight altitude of 90 meters (compared to the current 60 meters), a dual payload port enabling integration of equipment such as telecom systems, and adaptation to maritime environments.

"This support strengthens our continuous growth and our commitment to delivering cutting-edge solutions to our clients," said Guilhem de Marliave, President and Co-Founder of Elistair. "With enhanced Research & Development and production capabilities, we are more ready than ever to meet the growing demands of our clients and to continue our mission of securing sensitive areas with our advanced tethered drone technology."

At the same time, Elistair continues its growth trajectory by moving into new premises, allowing for an increase in production capacity to meet rising international demand from prestigious clients in over 70 countries.

### About Elistair

*The "Tethered Drone Company": Elistair is the leading manufacturer of tethered drone systems for persistent surveillance and tactical communications. The company's products are used and deployed by armed forces, law enforcement, civil security and private security in over 70 countries for event protection, perimeter surveillance, border protection and pop-up communications. Elistair offices are in France, and in the United States in North Carolina. Visit our website: <https://elistair.com/>*
